ADTEK

NEW

CPM-80 SERIES POWER ANALYZER

- Single phase/ 3-phase parameters:
  V, A, P, Q, S, PF, Hz, W, Watt-Hr, Var, Var-Hr
- 2~63rd THD
- Waveform capture (128 points x 3 cycles)
- 4DI, 2DO, 2RO
- Automatic wiring detection and correction
- TOU , Cost, CO2 emission
- 2MB Memory
- Multi communication Ports (RS485, Zigbee, Ethernet)

Applications

1. Power Quality Analysis Monitoring of High/Low Voltage Switchboard
2. Plant Automation Monitoring

NEW

CPM-70 SERIES MULTIFUNCTION POWER METER

- Single phase/ 3-phase parameters:
  V, A, P, Q, S, PF, Hz, W, Watt-Hr, Var, Var-Hr
- 2~31st THD
- 4DI, 2RO
- RS485 Modbus Communication
- TOU , Cost, CO2 emission
- 2MB Memory

Applications

1. Power monitoring of Motor Control Switchboard
2. Distribution Power Monitoring
3. Energy Management and Electricity Cost Allocation System
4. Power Quality Analyis

CPM-20 SERIES ECONOMIC TYPE MULTIFUNCITON POWER METER

- Single phase/ 3-phase parameters:
  V, A, PF, Q, S, PF, Hz, W, Watt-Hr, Var, Var-Hr
- 2~31st THD
- Demand, DI, DO
- Cost, CO2 emission
- Max/Min statistical logging
- RS485 Modbus Communication

Applications

1. Power Monitoring of Motor Control Switchboard
2. Distribution Power Monitoring
3. Energy Management and Electricity Cost Allocation System
4. Power Consumption Monitoring of Mechanical Equipment

CPM-10 ECONOMIC TYPE MULTIFUNCTION POWER METER

- Single phase/ 3-phase parameters:
  V, A, PF, Q, S, PF, Hz, W, Watt-Hr, Var, Var-Hr
- SPDT Relay Output with 3 set points
- RS485, Pulse Output, Analogue Output

Applications

1. Power Monitoring of Motor Control Switchboard
2. Distribution Power Monitoring
3. Energy Management and Electricity Cost Allocation System
4. Power Consumption Monitoring of Mechanical Equipment

NEW

AEM-DRA SEIRES MULTI-CIRCUIT POWER METER

- Single phase 24 circuits / 3-phase 8 circuits' parameters:
  V, A, PF, Q, S, PF, Hz, W, Watt-Hr, Var, Var-Hr
- 2 communication Ports:
  1st Port: RS485 Modbus RTU
  2nd Port: RS485/LonWorks/Profibus/BACnet/Zigbee/Ethernet
- 128 x 64 dot-matrix LCM
- 2~31st Individual Harmonic, demands & TOU
- 2MB Memory
- DIN-rail mounting

Applications

1. Rental Building Electricity Charging Management
2. Booth Electricity Charging Management
3. Market/Vender/Stand Electricity Charging Management
4. Rental Apartment Electricity Charging Management
5. Distributed Generation Electricity Charging Management
6. Dormitory Electricity Charging Management

MWH-10A 10 DIGITS WATT & WATT-HR ENERGY METER

- Dual display: 10 digits Watt-Hr, 4 2/3 digits Watt
- 1 Relay Output, 1 Analogue Output,1 Pulse Output
- RS485 Modbus Communication

Applications

1. Electricity Charging System
2. Power Consumption Monitoring and Controlling
3. Power Distribution System
4. Automatic Energy Management System of Intelligent Building
5. Power Testing Equipment

AEM-DR SERIES MULTI-CIRCUIT POWER METER (W/ PATENT)

- Single phase 5 circuits / 3-phase 2 circuits parameters:
  V, A, PF, Q, S, PF, Hz, W, Watt-Hr, Var, Var-Hr
- Multi-circuit
- RS485 Modbus Communication
- DIN-Rail mounting
- 1MB Memory
- Modular Expansion Design

Applications

1. Rental Building Electricity Charging Management
2. Booth Electricity Charging Management
3. Market/Vender/Stand Electricity Charging Management
4. Rental Apartment Electricity Charging Management
5. Distributed Generation Electricity Charging Management
6. Dormitory Electricity Charging Management
7. Trailer Coach Electricity Charging Management

VAW MULTIFUNCTION DC POWER METER

- Measure DC voltage, DC current, DC power, DC energy and Run Hour
- Direct measure DC voltage up to 600V
- 4 RO, 1AO, 1 Pulse Output, 2 DI, DO
- RS485 Modbus Communication

Applications

1. Solar and Wind Energy Systems
2. DC Energy Management Systems
3. Industrial DC Control Systems
4. UPS Systems Monitoring
5. Power Consumption Testing of Portable Electronic Devices

CPT MULTIFUNCTION POWER TRANDCUER

- Single phase/ 3-phase parameters:
  V, A, W, PF, Hz, VAR, Watt-Hr, Var-Hr
- 2 Pulse Outputs, 4 Analogue Outputs, Relay Output
- Free software for configuration
- Class 0.2
- RS485 Modbus Communication
- IEC 60688

Applications

1. Power Plant/ Substation Automatic Control System
2. Power Distribution Motor Control Monitoring
3. Energy Consumption Monitoring and Control for Mechanical Equipment
4. Automatic Energy Management System for Intelligent Building
5. Power Testing Equipment

WTM-100 WIRELESS TEMPERATURE METER

- Reliable, stable and easy to setup
- 24 hours online real-time monitoring
- Wireless transmission, suport up to 12 sets of wireless temperature sensors
- RS485 Modbus Communication

Applications

1. High voltage switch boxes and copperhead contacts, high voltage cable connectors, and dry-type transformers
2. Temperature monitoring for low voltage, high current cabinets and other equipment

SENSING TRANSDUCERS

- Temp. & Humidity Converter
- T&H, CO, CO2, PM2.5, VOC Sensor
- Temperature Transducer
- Pressure Transducer
- Level Sensor
- Carbon Monoxide
- Split Core Current Transformer
- Power Supply
- Photo-electric sensor
- Proximity Switch
- Encoder
- Carbon dioxide

N. America
South of Canada, Easter Coast of America, Mexico

ASIA
Taiwan(Headquarters), China (Shuzou office), Russia, Korea, Philippine, Singapore, Malaysia, Thailand, Vietnam, India, Pakistan, Iran

Europe
Denmark, UK, Belgium, Portugal, Spain, Romania, Greece, Turkey

Africa
Egypt, Saudi Arabia, United Arabia Emirates, South Africa

S. America
Venezuela, Brazil, Chile, Argentina

Oceania
Australia

APPLICATION of DL1S DATA LOGGER

Combine the usage of DL1S and CPM-70 for recording the parameters. Chronological record the parameters (VAC, AAC, KW, KWH, PH, HZ, ...) and Power quality (1~31st Individual Harmonic, Un-balance, K Factor, Crest Factor, ...) in SD card of DL1S from multifunction power meter via a RS485 serial communication port, and providing ADPro software to convert the data into Excel spreadsheets (.xls) for analysis. Along with Split core CT such as US-CTS or US-CTA/ US-CTB for long-term Data-Logging.

CPM-80

CPM-70

CPM-20

APPLICATION of POWER ANALYZER
## INSTALLED in CONTROL ROOM for POWER CONTROLLING

Utilizing multifunction power meter to measure the power consumption in control room and display parameters of V, A, Hz, P, Q, S, KWH, KVAR and parameters of power quality such as individual harmonic from 2nd to 63rd. All monitored data is available via a RS485 serial communication to PC monitoring and controlling system for data acquisition and analysis in order to improve the power supply system in control room and ensure the equipment operating properly.

MWH-10A MONITORING THE POWER
CONSUMPTION of MECHANICAL EQUIPMENT

MWH-10A

Utilizing MWH-10A to measure the power consumption and display parameters of KW & KWH for mechanical equipment as well as acquiring and analyzing all measured data via RS485 communication port running the Modbus RTU protocol in order to diminish the power consumption and CO_2 emission, conserve energy and save money.
AEM-DR MULTI-CIRCUIT POWER METER

Provide high accuracy measurement of single-phase 5 circuits or 3-phase 2 circuits parameters (V, A, P, Q, S, PF, Hz, KWh). DIN-rail mounting completely fits indoor switchboard installation of European standard. Multi-circuit design and relay output modular expansion design decrease the overall cost and make the functionality more flexible. All monitored data is available via an RS485 serial or a PLC communication for the needs in energy management, alarming, and remote controlling. Embedded flash memory for Data-Logging can avoid any data missing once the communication is interrupted.

NEW

AEM-DRA SEIRES MULTI-CIRCUIT POWER METER

Provide two main circuits, single-phase 24 circuits or three-phase 8 circuits' parameter measuring. Diverse selection of circuits and wiring makes DIN-rail mounted AEM-DRA more flexible, easy to install, and can be applied to various power measurements and monitoring applications. Equip with standard communication interface of RS485 (Modbus RTU Mode), input & output interface, display, data-logging, and optional second communication interface for Modbus, Lonworks, Profitbus, BACnet, Ethernet and Zigbee.

DATA ACQUISITION

Provide 8/16 channels multiple inputs converting to RS485 communication for centralized data acquisition of testing equipment, mechanical controlling equipment and cold storage equipment.
