

# EnergoM-PR260

## Modular motor management

### Description

EnergoM-PR260 is modular design motor management device, accommodate more I/O modules. Flexible arrangement of motor control modes and state sensing, monitors voltage, current, and temperature to provide a comprehensive package of 22 protective functions, with integrated protection, motor control, metering, and data-logging functions.

This system is typically used to provide protection for three-phase low- and medium-voltage, medium to high-horsepower induction motors.

### Features

- Panel mounting HMI unit and Din-rail mounting control module.
- Suit for Motor under 0.66KV and any current range.
- HMI unit provide 3-phase current voltage monitors, Power Measurement.
- Control unit use .../5ACT connect.
- Abundant protection modes can be freely selected to alarm or trip.
- Can selected a variety of startup modes for different wiring application.
- 100 lists Waveform capture function, easy to trace back the fault.
- RS-485 network communications.
- 4 digital outputs, and 7 digital inputs.
- Optional 2 programmable analog output.
- Extra optional Modular:

  - PR-26C extra 2\* RS485 or 2\* Profibus-DP port;
  - PR-265 extra programmable 11\*DI and 6\*DO.
  - Accept customized extra function module.

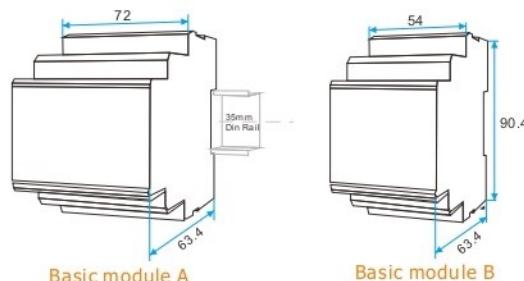

### Technical characteristics

| IEEE / ANSI C37.2 PROTECTION FUNCTIONS |                                  |
|--|----------------------------------|
| 48                                     | Max. Start Time                  |
| 49, 51                                 | Overload                         |
| 51                                     | Increased safety motors overload |
| 51R                                    | Over Current Level 1 - Jam       |
| 47                                     | Phase loss                       |
| 46                                     | Current imbalance                |
| 50G/N, 51G/N                           | Ground fault                     |
| 50                                     | Over Current Level 2 - Short     |
| 32L                                    | Under Power                      |
| 38                                     | Over temperature                 |
| 59                                     | Over voltage                     |
| 27                                     | Undervoltage                     |
| 81U/81O                                | Abnormal frequency               |
| 55                                     | Lead / Lag PF / Low Power Factor |
| 74                                     | Welded Contactor                 |
| 86 or 94                               | External fault                   |
|  | Data logging                     |
|  | Wave capture                     |

### Installation Dimensions

Unit: mm

|        |                    |     |
|--------|--------------------|-----|
| PR 260 | Acquisition module | B+A |
| PR 265 | I/O Unit           | A   |
| PR 26C | Comm Unit          | B   |
